Subject: Letter of Appreciation

Respected Madam,

Thank You very much for delivering an Informative and thought provoking lecture as a guest speaker of online Webinar "**Industry-Institute Interaction: Natural & Sustainable Platform**" held on 27/04/2022 at Cosmetic Technology Department, Vidya Bharati Mahavidyalaya Amravati. It was really a splendid presentation which exposed students to the Natural & Sustainable Material overview and its helpful in their project report. All the students of Department of Cosmetics were benefitted from your innovative views on the subject. Looking forward for your co-operation for the promotion of professional education in future as well.

Thanking You!

Report on
Guest Lecture on
“Recruitment Training Program”

The objective of recruitment training is to enhance the skills and working capability of newly recruited candidates. Recruitment training is essential to involve the newly appointed employees in their current job positions. Training helps to familiarize new staff with the new work environment, work culture and company objectives. Training after recruitment is also helpful for new employees to understand rules and regulations of an organization.

The success of a training program depends largely on the recruitment trainers. It is essential for a recruitment trainer to possess sound knowledge regarding the mission of the organization. A trainer with good technical know-how can help the trainees understand their job quickly. In some cases, the newly recruited candidates are trained to use tools and technologies related to an organization. In such case, the trainer must be adept in not only using but also in instruction regarding the use of these. In addition, a trainer should have great communicating and management capabilities.

A perfect training program involves all strategies that an employee requires to perform the job well. Mistakes are quite natural for the beginners; but they can correct these through appropriate training. Training is a learning process through which a candidate identifies mistakes, corrects them and avoids that mistakes thereafter. Pursuing a Degree in Computer Science such as, expertise in computing enables us to solve complex, challenging problems. Computer science is a really versatile degree. People who have computer science levels is found employed in the public plus the personal sectors. Computer Science is one of the fastest growing career fields in modern history. Career in Computer Science is considered one of the most high-paying jobs and this sector is broad in terms of employment and job opportunities. Computer Science students can get jobs in non IT companies as well in universities, research, private and public industries, government

departments.

A Guest Lecture on “**Recruitment Training Program**”

was held on 07th Sep 2022 at 12 noon in AV Theatre, Third Floor Main Building for MSc. I, MSc. II year, and B.Sc. Final year students. Various Students and Faculty members was present to attend the lecture.

The host for the program is Mr. Noman Ali of BSc III year . He welcome all the dignitaries. A heartily floral welcome of Guest Mr. Nakul Deshmukh Sir was done by our respected head of department Prof. Ather Iqbal Sir. After guest welcome introduction of guest is done Mr. Noman Ali . Later on the guest speaker Mr. Nakul Deshmukh was called to Start his session.

The lecture was delivered by **Mr. Nakul Deshmukh Director, iBase Technology Solutions, Amravati**. The lecture enabled the students to acquire knowledge about recruitment training program, automation tools and understand the requirements for getting jobs in core sectors. He spoke about the importance of computer science in various fields. The speaker motivated the students to do internship in the MNC's.

The guest speaker has more than 16 years of rich experience in IT industry. During his 16 years in IT industry he worked with many reputed organizations and his vast knowledge and experience was reflected in his lecture. The speaker also shared her industry experiences about software engineering faced by his team and what measure they took to identify and remove that risk. The session was very interactive and students participated enthusiastically.

Learning and Development are an essential function of Human Resources, as it contributes towards the growing and nurturing of the employees of an organization. With the dynamic change in the domain of Human Resources over the years, it has clearly been evident that this aspect has evolved to be one of the important factors in talent creation and retention. Sir explains that with all of this advancing technology comes a greater need for professionals who can keep servers, systems, and software working. If you're one of the many people interested in this growing field, you might be wondering, “Which computer science career is right for me?” It's a big question because there's so much to choose from. Once you have an idea of which areas interest you most, you can prepare for that career with the best computer science degree that fits your needs.

Report on **Workshop of** **“Software Development”**

The objective of software development program is to enhance the skills and working ability of students as a team member. Software Development will prepare students to be successful professionals in the field with solid fundamental knowledge of software development. Software developer utilize and exhibit strong communication and interpersonal skills, as well as professional and ethical principles when functioning as members and leaders of multi-disciplinary teams. Developer will apply their foundations in software development to adapt to readily changing environments using the appropriate theory, principles and processes.

The success of software development program depends on work of student as an individual and as part of a multidisciplinary team to develop and deliver quality software. Student will have to demonstrate how to apply the software engineering lifecycle by demonstrating competence in communication, planning, analysis, design, construction, and deployment. Developer will have ability to work in one or more significant application domains. Developer will demonstrate an understanding of and apply current theories, models and techniques that provide a basic for the software lifecycle. Developer will be able to use techniques and tools necessary for engineering practice.

A perfect software development program involves all strategies that an employee requires to perform the job well. He spoke about the importance of computer science in various fields. The speaker motivated the students to do internship in the

The guest speaker has more than 5 years of rich experience in software development. He worked as developer with many reputed organizations and his vast knowledge and experience was reflected in his lecture. The speaker also shared her industry experiences about software engineering faced by his team and what measure they took to identify and remove that risk. The session was very interactive and students participated enthusiastically.

Learning and Development are an essential function of Human Resources, as it contributes towards the growing and nurturing of the employees of an organization. With the dynamic change in the domain of Human Resources over the years, it has clearly been evident that this aspect has evolved to be one of the important factors in talent creation and retention. Sir explains that with all of this advancing technology comes a greater need for professionals who can keep servers, systems, and software working. If you're one of the many people interested in this growing field, you might be wondering, "Which computer science career is right for me?" It's a big question because there's so much to choose from. Once you have an idea of which areas interest you most, you can prepare for that career with the best computer science degree that fits your needs.
