3. Report:

Report on
Online Guest Lecture on
“Importance of Microsoft Certification”

Career in Computer Science is considered one of the most high-paying jobs and this sector is broad in terms of employment and job opportunities. Computer Science students can get jobs in non IT companies as well in universities, research, private and public industries, government departments, business organisations, commercial organisations and the manufacturing sector, etc. Earning a computer science degree opens up numerous

career opportunities.

The main objective of this Guest Lecture is to enlighten the students about the aspects where they need to put more effort for kick starting their career in Computer Science. As we live in a world driven by data and technology, developing IT skills is obviously a good idea. At the same time, as the demand for these types of skills is continuously growing, it is never too early to start preparing for the future. Altogether, this is a reason why students should opt for, or at least have the option to learn about development and programming. For this reason, we are going to dedicate this entire lecture to the “Importance of Microsoft Certifications for a student”.

Earning Microsoft certifications puts you in good company – namely, a unique group of professionals skilled in a particular technology. This peer group can be an invaluable career-long resource when you’re facing a difficult problem or if you’re seeking specific technical advice.

Microsoft says the future’s high wage, high growth industry requires knowledge of Microsoft Office and companies would want to hire the best for such jobs. According to Microsoft, **86%** of hiring managers indicate that they prefer job applicants having an IT certificate. And Microsoft certification is a preference over some unknown computer training institutes’ certificates.

A Guest Lecture on “**Importance of Microsoft Certification**” was held on 17th January 2022 at 12 noon in online mode for the students various department of college. Principal’s of various colleges, Head’s of various departments & various Faculty members was present to attend the lecture.

The host for the program is Prof. Ashwini Rathi . She welcome the guest speaker & also welcome all the dignitaries. She gave the brief Introduction of Mr. Rahul Bhargawa. Mr. Rahul Bhargawa is the Managing Director of R Dot Ventures, Indore. The lecture was delivered by **Mr. Rahul Bhargawa** he enabled the students to acquire knowledge in programming languages, automation tools and understands the requirements for getting jobs in core sectors. He spoke about the importance of computer science in various fields. The speaker motivated the students to do internship in the MNC’s.

The speaker also shared her industry experiences about software engineering faced by his team and what measure they took to identify and remove that risk. The session was very interactive and students participated enthusiastically.

Rahul Sir explains that Microsoft has certification paths for many technical job roles. Each of these certifications consists of passing a series of exams to earn certification. He also tells that with all of this advancing technology

comes a greater need for professionals who can keep servers, systems, and software working. If you're one of the many people interested in this growing field, you might be wondering, "Which computer science career is right for me?" It's a big question because there's so much to choose from.

"Computer science has changed so drastically over the years, especially in the past five years," explains Sharique Sir. He continued that in the early days of computer science as an academic discipline, it was mostly about programming. Today, though, it really revolves around the user experience. A major in computer science is a well-rounded option which will prepare students for software development and design positions as well as roles in networking, says Sharique Sir. He also says a solid background in math is helpful.

At the end of session question answer session was started. Students were asked various question to Rahul Bhargav Sir and he had cleared all the quarries and doubts of students very well. Near about 101 students were present in this event. As per the feedback received from the participants it was very good learning experience, the lecture helped them in increasing their knowledge about best industry practices in Computer Science. At the end of the program the vote of thanks is done by Prof. Rana Afreen Sheikh.

Guest Lecture on
“Live Project Training Programme”

Career in Computer Science is considered one of the most knowledgeable. Lively and interactive training programme need engaging activities. “Examples & Practical Guidance: adopt, adapt and develop” Lecture offered a range of approved training structures, exercise and resources from open science training expert.

This is for all those people who have little knowledge of everything needed to become a Software Developer but are unable to use their programming knowledge to develop real-time applications.

The main objective of this Guest Lecture is to enlighten the students about the aspects how to develop projects in different programming languages, processing cycle for development. Being a Computer Science Student what are the different challenges that one can face and what are the different perks that one can get while development.

Computers are part of almost every part of our lives, from the phones we use to the food we eat. So **majoring in computer science can be a seriously smart move for the 21st century**. Not only will we learn about computers software, we'll also learn about the real-world applications, websites development in different languages.

A Guest Lecture on “**Live Project Training Programme**” was held on 21st March 2022 at 12 Noon in Digital Classroom, Third Floor main Building for MSc. I, MSc. II year, and B.Sc. Final year students. Various Students and Faculty members were present to attend the lecture.

On

“ SUCCESS ALPHABETS”

Our Department was organised Workshop on “ SUCCESSALPHABETS”for computer Science students. The Association of iBaseelectrosoft& Solutions& NTA National Trainers Association, the Student Committee of computer society, had conducted a Workshop in the A.V.Theatre on “ SUCCESSALPHABETS”on30th December 2021. **Mr.AnujBharati, Director-Trainer,NTA Association &iBasesolutions** as speaker and received an overwhelming response of 150 participants from second and third year of Computer Science Department. The Workshop“ SUCCESS ALPHABETS”covered the following things.

A Carrier in Computer Science faces new challenges every day. Artificial intelligence and machine learning are the part of computer science that are correlated with each other. These two technologies are the most trending technologies which are used for creating intelligent systems. Artificial intelligence is a technology which **enables a machine to simulate human behavior**. Machine learning is a subset of AI which allows a machine to automatically learn from past data without programming explicitly. The goal of AI is to make a smart computer system like humans to solve complex problems.Machine learning (ML) is a type of artificial intelligence (AI) that allows software applications to become more accurate at predicting outcomes without being explicitly programmed to do so. Machine learning algorithms use historical data as input to predict new output values.

The students also had all their queries solved and doubts cleared by the volunteers from the committee, who were always present there to assist them.

AI is a bigger concept to create intelligent machines that can simulate human thinking capability and behaviour, whereas, machine learning is an application or subset of AI that allows machines to learn from data without being programmed explicitly. The Artificial intelligence system does not require to be pre-programmed, instead of that, they use such algorithms which can work with their own intelligence. It involves machine learning algorithms such as Reinforcement learning algorithm and deep learning neural networks. AI is being used in multiple places such as Siri, Google?sAlphaGo, AI in Chess playing, etc.
