

Proposal for
Vocational Education Training

In

The Study of Beauty Therapy

For

B.Tech. (Cosmetics) Students

Submitted by:
Department of Cosmetic Technology
(2019-2020)

Aim: Vocational training is generally defined as the part of vocational education that provides the specialized professional knowledge and skills, which attribute professional adequacy to the trainee and are the focus of every vocational training program. Vocational training can be seen as an activity or a set of activities designed in order to transmit theoretical knowledge and also professional skills that are required for certain types of jobs.

The term vocational education is general and includes every form of education that aims to the acquirement of qualifications related to a certain profession, art or employment or that provides the necessary training and the appropriate skills as well as technical knowledge, so that students are able to exercise a profession, art or activity, independently of their age and their training level, even if the training program contains also elements of general education.

The main aims of VET are considered the following:

- To develop the professional knowledge and skills required for the practice of a profession.
- To evaluate the participants' educational level, in order for them to become competitive professionals in the future.
- To assist the students in their gentle adjustment to the changes in the productive procedures.
- To provide specialized training initial or continuing.
- To satisfy the continuously changing needs of the labor market.
- To cultivate the integration of the students in professional life and in community as well.

Objective:

- To ensure a steady flow of skilled workers in different trades for the industry.
- To develop a healthy attitude among students towards work and life.
- To reduce the mismatch between the demand and supply of skill-man power.
- To reduce the level of unemployment by providing self-employment schemes.
- To make the students skilled technician.
- To raise the economic standard of people.
- To give opportunities for professional growth, career improvement and lateral entry into course of technical and professional education through appropriate bridge courses.
- To raise the quality & quantity of industrial production by systematic training of workers.
- To increase the productive potential of the country.
- To reduce unemployment among the educated youth by equipping them for suitable industrial employment.
