

Proposal for

Value Added Course

In

Study of Skin Care Cosmetics

For

B.Tech. (Cosmetics) Students

Submitted by:

Department of Cosmetic Technology

(2019-2020)

Aim: Value added course is generally defined as the part of vocational education that provides the specialized professional knowledge and skills, which attribute professional adequacy to the trainee and are the focus of every vocational training program. Value added course can be seen as an activity or a set of activities designed in order to transmit theoretical knowledge and also professional skills that are required for certain types of jobs. The term vocational education is general and includes every form of education that aims to the acquirement of qualifications related to a certain profession, art or employment or that provides the necessary training and the appropriate skills as well as technical knowledge, so that students are able to exercise a profession, art or activity, independently of their age and their training level, even if the training program contains also elements of general education.

The main aims of Value added course (VAC) are considered the following:

- To develop the professional knowledge and skills required for the practice of a profession.
- To evaluate the participants' educational level, in order for them to become competitive professionals in the future.

- To assist the students in their gentle adjustment to the changes in the productive procedures.
- To provide specialized training initial or continuing.
- To cultivate the integration of the students in professional life and in community as well.

Objective:

- To ensure a steady flow of skilled workers in different trades for the industry.
- To reduce unemployment among the educated youth by equipping them for suitable industrial employment.
- To reduce the level of unemployment by providing self-employment schemes.
- To make the students skilled technician.
- To give opportunities for professional growth, career improvement and lateral entry into course of technical and professional education through appropriate bridge courses.
- To raise the quality & quantity of industrial production by systematic training of workers.
