A STATE LEVEL WORKSHOP

ON

Patent Drafting, Filing and Processing"

(29TH November 2018)

Organized by

Department of Botany

Under HRDC,

Vidya Bharati Mahavidyalaya, Amravati

OBJECTIVES OF ORGANIZING THE WORKSHOP

As the world moves from an economy based on industry to one based on information, protecting ideas becomes increasingly important. This follows from the fact that ideas, when captured and passed on as information, can be transferred from one place to another much more easily and quickly than physical objects. It also follows from the fact that the economic value of information is greatest when it relates to an idea, rather than a fact about a physical object. Because information about ideas is so valuable and so easy to obtain and use, protecting ideas becomes a paramount concern.

A Patent represents one branch of a legal field known as Intellectual Property Rights. Intellectual property management encompasses creation, protection & exploitation of Intellectual Property Rights. A Patent is a legal document granted by the government giving an inventor the exclusive right to make, use and sell an invention for a specified period of time. Thus legally protecting discoveries and inventions through patents provides an incentive for researchers and businesses to undertake scientific inquiry in the hopes of a financial benefit in return.

The minorities, women, children, and ethnic groups have not got their proper share. Therefore, the complexities of social problem have been rapidly increasing. Proper understanding of the problem and proper methodology are essential part of research. Over a period of time, nature of social problems has changed enormously because modern societal problems are multidimensional in nature.
